FOR FINANCIAL  
MANAGEMENT

## Receivables Management

Maintain tight control over Accounts Receivable with capabilities that help you track invoices, process receipts, and analyze customer activity, so you can manage sales made on account more effectively and yet maintain lower overhead costs.

VIEW CUSTOMER  
BALANCE INFORMATION  
in summary and drill  
down to analyze  
transaction details.

The screenshot displays the Microsoft Business Solutions - Great Plains software interface. The main window is titled "Customer Summary" for customer "AARONFIT0001" (Aaron Fitz Electrical). It shows a summary of sales and receivables by period (Current, 31-60 Days, 61-90 Days, 91-120 Days) and by type (Unposted, Sales/Debits, Cash/Credits, Other Sales, Other Cash, On Order). Below this is a "Receivables Transaction Inquiry - Customer" window for the same customer, showing a list of transactions with columns for Doc. Date, Due Date, Document Number, Check Number, Document Amount, and Amount Remaining. A third window, "Salesperson Maintenance", shows details for salesperson "SANDRIA M. Martinez" (Employee ID: MART001), including address, phone, and fax information. A fourth window, "Salesperson History", shows a table of sales performance data for Sandra Martinez from May 2003 to May 2004.

Month/Period	Total Commissions	Commissioned Sales
May 2003	\$326.71	\$10,090.24
July 2003	\$244.96	\$8,144.69
Aug. 2003	\$502.24	\$16,741.30
Sep. 2003	\$765.67	\$26,188.57
Oct. 2003	\$1,296.96	\$43,231.39
Nov. 2003	\$1,386.76	\$46,224.81
Dec. 2003	\$2,241.44	\$74,714.70
Jan. 2004	\$6,354.43	\$211,813.70
Apr. 2004	\$507.04	\$16,900.98
May 2004	\$203.09	\$6,769.70

ANALYZE YOUR SALES  
PERFORMANCE with  
receivables tracking for  
each salesperson or sales  
territory.

### Help improve customer satisfaction

Enhance service levels and increase retention with customized information, history, and notes that are easily accessible when working with customers.

### Take control of sales processes

Manage your sales process more effectively by measuring trends and analyzing performance with comprehensive customer tracking combined with sales tracking by person or territory.

### Enhance your productivity

Help reduce administrative costs and enhance office productivity with automated receipt processing and posting and personalized statement cycles that fit your customers and business.

### Streamline revenue allocation

Simplify the task of deferring revenues over multiple periods with automatically managed calculations and journal entries customized to fit your business needs.

### Provide access to vital information

Find the information you need to make more effective business decisions with comprehensive reporting capabilities and straightforward customer account and sales performance tracking.

# Receivables Management

## FEATURES OVERVIEW

### Receivables Management

- View un-posted, posted, and historical transactions, plus complete customer, period sales, yearly sales, payment history, and receivables summary information.
- Utilize user-defined fields to track the customer information you need to improve sales and customer service, including: ship to, bill to, and statement to addresses; and credit limit, payment terms, and account history.
- Automate your customer installment payments by creating schedules, calculating interest, amortizing amounts, and forecasting the impact of variable interest rates, payment amounts, and installment changes.
- Maintain full control over the receivables process with automated lockbox processing, customer billing defaults, NSF tracking, multicurrency support, and the ability to fully define customer statement cycles.
- Analyze your sales performance with receivables tracking for each salesperson or sales territory, including commissions, commissioned sales, noncommissioned sales, and cost of sales for the year to date.
- Create a comprehensive suite of reports that can be sorted by calendar or fiscal year with on-screen display and search, or combine with Microsoft® Business Solutions–Great Plains® modules such as Report Writer or Crystal Reports for greater reporting flexibility and power.
- Automate processes for writing off and adjusting overpayments and underpayments, as well as create and apply debit and credit documents for open balances.

### Customer/Vendor Consolidations

- Define relationships with existing customers who are also vendors and apply open debit and credit documents against each other to consolidate current balances in both Payables and Receivables Management.

### Refund Checks

- Debit memos are automatically created in Receivables Management and are applied to credit amounts for customers requiring refunds. This process also automatically creates the refund check for those customers using Payables Management.
- Easily setup a temporary vendor to use for refund checks. Process refunds for balance-forward customers using multiple currencies.
- Reduce paperwork with the ability to issue refund checks to the parent of the national account for credits existing on the child account.

### Lockbox Processing

- Automatically import and apply customer payment information from a lockbox transaction file provided by your bank. By streamlining manual data entry and cash application, Lockbox Processing provides reliable receivables information, improved funds availability, increased productivity and greater fraud protection.

Financial Management modules are licensed separately. Customer/Vendor Consolidations is not available with Microsoft Business Solutions–Great Plains Standard.
